

Liquid mechanical ware washing detergent for hard water

Description

Suma Nova Pur-Eco L6 is a concentrated liquid detergent for mechanical ware washing. It provides excellent soil removal in hard water conditions.

Key properties

Suma Nova Pur-Eco L6 is a heavy duty alkaline liquid detergent suitable for use in single and multi-tank ware washing machines. It contains a blend of alkali and scale control agents that remove fats and dried-on foods. The high level of powerful scale control agents also prevents scaling in hard water conditions.

Benefits

- Quickly removes grease and dried-on food
- Prevents scaling of the dish wash machine even in medium to hard water conditions
- Very effective due to highly concentrated formulation
- EU Ecolabel (EU-flower) certified
- Reduced impact on aquatic ecosystems
- Limited hazardous substances
- Performance tested

Use instructions

Suma Nova Pur-Eco L6 is normally applied using Diversey automatic dosing equipment. It can also be used in conjunction with integral dosing pumps where these are fitted. To ensure perfect cleaning results in hard water conditions, dose according to the degree of soil, and the water hardness. Dose at a minimum concentration of 0,4ml/l* depending on local site conditions. At 2ml/l, this will prevent scale deposits in water containing up to 135ppm CaCO₃ 7,58°dH, 13,5°F.

Using the EU Ecolabelled product according to dosage instructions will contribute to the reduction of water pollution and waste production. Maximum dosage according to EU Ecolabel criteria is 3,5ml/l.

Proper dosages and temperature save costs and minimize the environmental impacts.

EU Ecolabel: SE/038/001

*This dosage is according to optimal conditions, recommendations may vary, please consult with your Diversey representative for directions.
